

## **Parry People Movers Ltd**

Parry People Movers Ltd supplies light rail vehicles for urban tramway systems and regional railways. PPM vehicles incorporate flywheel energy storage, allowing electrical power without continuous overhead wires, or self-powered operation with small gas, diesel or hydrogen units. The environmental performance of PPM vehicles is among the best of any passenger transport mode.

PPM technology responds to the need for high quality but inexpensive public transport in towns and in the regions.

- **High quality passenger transport**

PPM vehicles give passengers the travel experience they expect.

- **Affordable and economical**

PPM technology reduces the cost of new rail vehicles and their cost of operation.

- **Energy-efficient and quiet**

PPM technology cuts power requirements and noise emissions.

- **Flywheel power: no wires**

PPM's energy storage system provides modern rail transport without electrification.

- **Minimal infrastructure needs**

Light PPM vehicles run on existing lines or on light, easily-laid new track.

- **Clean and green**

PPM technology maximises energy efficiency and minimises emissions.

- **Choice of specification**

Appearance, size, track gauge, boarding height, power system: PPM's customers decide.
